SKILLS

Core

React JavaScript HTML5
CSS3 Vite

Ecosystem

Tailwind CSS React Router
React Hook Form Zod

Integrations

Firebase SignalR Axios
Stripe

Tooling

Git Framer Motion
Bootstrap

LANGUAGES

Arabic Native
English Proficient

CERTIFICATIONS

ITI — Information Technology
Institute
Front-End Web Development
Training

Youssef Hassan

Front-End Developer — React

Front-End Developer specializing in React, with one year of hands-on experience shipping three full-scale, production-style applications — one as a graduation project, two as freelance work for private clients. Comfortable owning a front-end end-to-end: routing, complex forms, real-time data, authentication flows, and multi-role dashboards. Focused on writing clean, maintainable code and delivering interfaces that feel fast and finished.

01 Experience

Freelance Front-End Developer

2025 — 2026

Self-employed

Remote — private clients, referred by personal network

- Built and delivered **KickZone**, a multi-sport stadium booking platform — stadium listings, slot-based booking, and a Super Admin panel with role-guarded routes.
- Built and delivered **PsycheConsult**, a bilingual (Arabic RTL) personal-brand website with a rich-text article system and an admin dashboard for content management.
- Worked directly with clients from requirements to deployment — no intermediary platform, full ownership of the front-end.

React Vite Tailwind CSS SignalR Firebase Tiptap

Graduation Project — SAYEFNA

2026

Tanta University

- Led front-end development of a multi-role luxury real-estate platform (Client, Landlord, Admin, SuperAdmin).
- Implemented a Stripe-powered KYC verification flow for landlord onboarding & payouts, real-time chat via SignalR, and 2FA authentication.
- Built the full booking lifecycle — request, confirmation, handover, and dispute resolution — with a detailed transaction ledger.

02 Education

B.Sc. in Computer Science

Graduated 2026

Faculty of Computers & Information, Tanta University

GPA 3.5 / 4.0

03 Training

Front-End Web Development

1 month

ITI — Information Technology Institute

- Intensive hands-on training covering React fundamentals, component architecture, and modern front-end tooling.

04 Highlights

- Self-taught developer — built a solid foundation in programming fundamentals independently before formal ITI training.
- Shipped 3 full-scale, production-style React applications within a single year.
- Comfortable across the full front-end surface — auth & KYC flows, real-time data, multi-role dashboards, and RTL layouts.
